## Your **FREE** ActronAir single zone reverse cycle unit will keep your family warm throughout the Tassie Winter

### ACTRONAIR CLASSIC SERIES 2 KEY FEATURES

**YEAR ROUND COMFORT** Unlike a conventional inverter, which can take between 5 and 10 minutes to get up to full capacity, the Classic ducted system can get up to maximum capacity almost immediately – perfect for when you need to get comfy fast.

**ENGINEERED FOR AUSTRALIA** Australian designed and built. Made with a superior operating range of -10°C to 50°C, the Classic ducted system is engineered to withstand the hottest and coldest conditions Australia can throw at it.

**EXTERIOR UNIT** The Classic's powder coated louvered grille guard allows for better airflow and protection against Australia's extreme weather conditions and uses blue fin epoxy coated protection on its indoor and outdoor coils, which helps to reduce corrosion from the harsh Australian conditions.

**QUIETER OPERATION** The Classic system's outdoor unit features a 3 speed fan allows for quieter operation (excludes CRA100S). The indoor unit uses a highly efficient EC Inverter indoor fan to deliver precise comfort control, smoother operation, and quieter starting and stopping.

**L-SERIES CONTROLLER** Available in your choice of grey or white, the L-Series comes packed with all the features you need to receive the best comfort and performance including: integrated zoning; clean and simple design; Near Field Communication (NFC); precise temperature control; and advanced scheduling functions.
